

HDR Researcher Profile

Name: Silvia Mariah Handayani

School of Education

Program: PhD

Thesis title: An Investigation of Heutagogical Teacher Training In Indonesia

Thesis Description:

My study aims to design and implement a teacher-training model based on heutagogy approach. In this respect, double-loop learning, reflective practice, and capability development are the main features in heutagogy as ways to generate learning experiences, encourage ideas, and reinforce previous learning. Collaborative learning also plays an important role in heutagogy, wherein sharing ideas, peer-to-peer reflection, and collective interpretation take place. The methodology of embedded design will be employed in my investigation. The findings of this study are expected to be significant for the improvement of teacher-training in Indonesia, particularly in North Sumatera.

Bio:

Silvia's research interest is on investigating heutagogy approach within the learning process. Prior to continuing her study at Southern Cross University, Silvia is a lecturer at Medan State University, Indonesia. Her passion is to learn how to empower both teacher and student within the learning process, so the learning can bring significant contribution not only to competency development but also to capability improvement.
