

# Asbestos Risk Assessment Based on Source Material

Please complete this form to identify the likelihood of asbestos contamination in your samples. This will inform the risk to EAL staff and the pathway for safe testing.

Please circle the number that applies to you and send to EAL with your sample submission form:

1. Does the product contain in any small part, materials sourced from C & D (Construction and Demolition) waste or from municipal curbside green waste collection?

**Increased Risk Product** – should be assessed for Asbestos Containing Material (ACM). Send an additional 500 g sample, double bagged with a note on the bag 'May Contain Asbestos'. Your bulk sample can commence testing with a hazard warning for asbestos and with changed testing procedures upon receipt.

2. Your product neither contains C & D waster or municipal curbside green waste?

**Low Risk Product** – Samples can commence testing upon receipt.

*Thank you for completing this survey.*
