

Dear Student,

As part of the Australian Institute of Project Management's partnership with Endorsed Course Providers, students enrolled in an endorsed course can join the peak body for project management in Australia as a Student Member. This is the first step in the journey to becoming a Certified Registered Project Manager, and will demonstrate to potential employers commitment to a project management career. AIPM also offers plenty of opportunities for networking, developing project management capabilities, learning from other professional best practice and receiving industry updates.

Upon the completion of the endorsed qualification and joining AIPM as an Associate or Member, students are entitled to automatic recognition for AIPM's Registered Project Manager (RegPM) Certification as a **Certified Practising Project Practitioner (CPPP)**.
