Master of Information Technology

Be part of a brighter future

Whether it's biometric recognition, digital health monitoring or connectivity to the Internet of Things, technology is shaping how we live at an unprecedented and increasing speed.

If you want to be part of this transformation, the Master of Information Technology (MIT) at Southern Cross University places you at the cutting edge through:

– Innovative learning with industry-led projects at the University's Digital Enterprise Lab including digital health, digital tourism and smart cities.

– Mastering cutting-edge technologies in artificial intelligence, virtual/augmented reality and the Internet of Things.

The MIT is taught at our contemporary Gold Coast campus in southern Queensland, overlooking beautiful North Kirra Beach. The Master of Information Technology is designed for both IT and non-IT graduates and professionals looking to advance their career in the application of IT tools and technologies for transforming businesses and creating new digital businesses.

Visit: **scu.edu.au/scucollege**

Course structure

Students complete eight core units that include a double-weighted industry research project, five units in a choice of specialisation and two electives. Students can select units from other specialisations as electives.

A globally recognised university experience

Southern Cross University is one of the Asia-Pacific's top Universities as recognised by the Times Higher Education World University and QS World University rankings.

The course is taught from our Gold Coast campus. The Gold Coast is Australia's sixth largest city, with a population of more than half a million people. Attractions include world-famous beaches, tropical rainforest hinterland, and numerous bush walks, parklands, major shopping centres, markets and entertainment.
