Evidence of relevant research experience

‘Research experience’ or possession of a ‘relevant research component’ must normally be supported by evidence in one of the following forms:

Relevant research component:

- Masters degree by coursework that is equivalent to a Masters Degree from this University which includes an independent research component such as a thesis, dissertation or research project that received a minimum overall GPA (Grade Point Average) of 5.65 out of 7 point scale. Research carried out in groups should at least have been graded individually.

Research experience:

- Scholarly papers involving a substantial contribution as an author, appearing in recognised academic journals or in volumes published by recognised academic publishers.
- Research or technical reports prepared for industry, government or business, which adhere to the broad conventions of academic publishing (i.e. contain an up-to-date review of relevant literature, a description of relevant research methods and an evaluation of results, etc.) and which identify the applicant as a significant contributor will be taken into consideration.
- Research Patents which adhere to the broad conventions of academic publishing (i.e. contain an up-to-date review of relevant literature, a description of relevant research methods and an evaluation of results, etc.) and which identify the applicant as a significant contributor will be taken into consideration.
- A portfolio of published creative work together with published critical discussion of some or all of that work, or of a comparable body of work by others, and which demonstrates the applicant’s involvement in the development of a scholarly approach to creative work as research investigation.
- Demonstrable industry or work experience where the applicant can clearly demonstrate that they have planned and executed a project, working with a high level of independence and there is evidence provided to support
