

Turnitin workaround to avoid students seeing assignment scores in the Grade Centre

Turnitin Assignments do not have the capacity to show students SCU Letter Grades. However, the workaround outlined below will ensure your students do not see a score, and instead only see a letter grade for their Turnitin Assignment. The workaround involves setting up an extra column in the Grade Centre that is set to show only SCU Letter Grades, and markers input results.

1. Create your Turnitin Assignment but make the assignment worth 0 **marks**.

2. Go to the Grade Centre and from the drop down options in the Turnitin column '**Hide**' the column from users (students).

3. Create a column in the Grade Centre for entering grades and uploading feedback.

1. Column Information:

* Column Name
 Grade Centre Name

This column will be visible to users (students) and included in calculations.

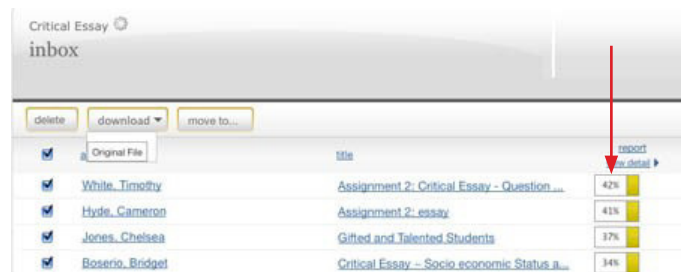

2. Options

Select **No** for the first option to exclude this Grade Centre column from calculations. Select **No** for the option to show column statistics to Students in My Grades.

- Include this Column in Grade Centre Calculations Yes No
- Show this Column to Students Yes No
- Show Statistics (average and median) for this column to Students in My Grades Yes No

To view the Originality Report for a Turnitin Assignment

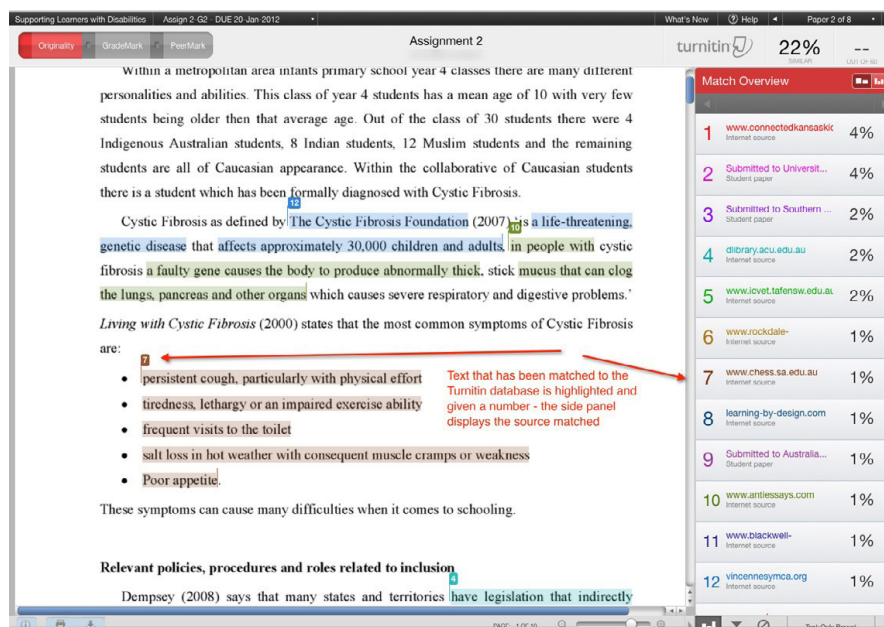

Click on the icon in the **report** column to view a student's Originality Report.

Interpreting the Originality Report

The Originality Report gives a 'Similarity Index', a measure of how much of the text in the submitted assignment matches other documents in the Turnitin database.

Please note that this index is not a measure of plagiarism. Turnitin cannot make any judgements about the nature of the matched text it identifies. It is up to teachers and students to interpret the report. Matches from coversheets, reference lists and from common strings of words can inflate the Similarity Index. It can pick up similarity even if a student has correctly paraphrased and/or quoted and referenced their sources accurately. **You cannot go on the percentage figure alone.**

Uploading feedback to students

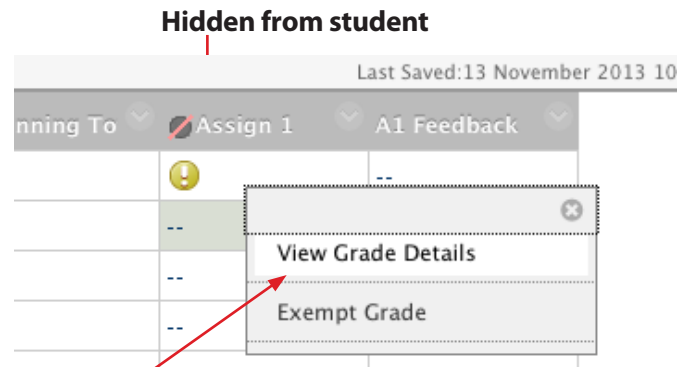

Uploading of marked assignments and/or feedback is done one assignment, one student at a time through the Grade Centre.

A workaround has been created to avoid students seeing their raw scores. It involves uploading the feedback to a second column (not the column with the Yellow Exclamation marks).

Column 1 will display the yellow exclamation mark to indicate a student has submitted their assignment. **Note:** This column is hidden from the student.

Column 2 (A1 Feedback) is where you enter the score/grade and submit feedback to students.

Note: This column will be the one visible to students.

1. In the Feedback column select '**View Grade Details**' from the dropdown options for the relevant cell.
2. From '**View Grade Details**' enter the grade/score in the '**Current Grade Value**' field (if you enter a score it will translate into the Grade when you exit and the student will only see the Grade).
3. In the '**Feedback to User**' text box you can write feedback comments and/or select the Insert file icon on the third row and attach the student feedback file.

Current Grade: - out of 50 points **Exempt**
Grade based on Last Graded Attempt
Due: None

Attempts | Manual Override | Column Details | Grade History

Current Grade Value
23

Feedback to User

Please find attached your feedback
[Feedback test.docx](#)

4. When you click on the paperclip icon a pop-up window opens up - select '**Browse My Computer**' and find the feedback file and click '**Submit**'.
5. The file will appear in the feedback to user window (see screenshot above).

Insert Content Link

Cancel Submit

1. **Select Content Link**

When attaching a file from your computer, you must first submit the content item, so that the file is assigned a permanent URL.

Attach File

6. Click **'Save'** at the bottom of the screen – you can then click on the arrow at the top centre of the screen to move to the next student.
